## PROJECTS

### University Attendance App

- Developed a mobile application for managing attendance within a university using Flutter.
- Used services like Firebase authentication, cloud firestore.

### RemoteTech – Remote device manager

- Developed a mobile application for centralized control of remote devices (smart TV, projector, slave computers, CCTVs, lights, fans, AC) as a part of college project.

### Text to Handwriting Converter

- Created a Python script to convert text files into custom handwritten text, facilitating college assignments.
- Implemented data structures and algorithms (DSA) for efficient file manipulation and format conversion.

## Experiences

### Android Developer Intern (Feb 2024 - Mar 2024)

- CodTech IT Solutions, India
- Used Flutter to develop various Android Apps with modern design and User Friendly Interface like, University Attendance System, Task Manager and Quote of the Day application.
