SUMMARY

Currently pursuing my Masters in Cyber Security with some knowledge of AI and some knowledge in Web pen-testing, Privilege escalation, Identifying vulnerabilities, Networks and creating backdoors and payloads. Seeking to leverage newly-minded skills and utilize my relevant skills.

EXPERIENCE

BMP – INFOTECH GROUP   Mumbai, Maharashtra
Cyber security intern   *Jul 2023 – Oct 2023*
- Worked on various types of tools and got hands-on with them and
- Created simple malwares, backdoors and payloads with the help of tools.
- Worked on finding basic noticeable vulnerabilities which gave me deeper understanding of them.

SYSAP TECHNOLOGIES   Pune, Maharashtra
CEH Trainee   *Nov 2023 – Feb 2024*
- Performed system hacking and exploiting vulnerabilities of various Operating systems.
- Information gathering through OSINT and exposure to OWASP Top ten.
- Got hands on with different ways of web application vulnerabilities.

EDUCATION

Indira College of Commerce and Science   Pune, India
Bachelor of Cyber Security   *2020 – 2023*
- CGPA – 9.17

D Y Patil International University   Pune, India
MCA Cyber Security   *2024 – Pursuing*

SKILLS

Technologies/Framework: Windows, Linux, Networking, Metasploit
Tools: Burp suite, Nmap, Wireshark, Nessus, Hydra
Languages: Python, Java Basics, HTML
Other: Advanced Microsoft excel, Problem solving, Communication skills, Teamwork

PROJECTS

Malicious URL Detection
- This project was designed using Machine learning algorithms which includes Random Forest classifier and Logistic Regression.
- The objective of this project was to detect phishing and malicious URLs and give output accordingly.
- It was developed using python language. The project was made using various web references and available material.

CERTIFICATES/ACHIVEMENTS

- **Ethical Cyber Hacking –** *Homeflic wegrow*
- **CyberShiksha Fundamentals –** *Quick Heal*
